

1.

Playwright code generation

PROMPT: I have already implemented java, selenium for my browser extension app [Important]

Once code updated it need to be work when I select the dropdown in the setting prompt[STRICT]

update it[IMPLEMENT]

feature file

```

```gherkin
Feature: Leaftaps Login

Scenario Outline: Successful login with valid credentials
 Given I navigate to the login page
 When I enter "" in the Username field
 And I enter "" in the Password field
 And I click the Login button
 Then I should see the Dashboard

Examples:
 | username | password |
 | SureshReddy | Secure@Hyd123 |
 | LakshmiNair | Kottayam@2026 |

Scenario Outline: Failed login with invalid credentials
 Given I navigate to the login page
 When I enter "" in the Username field
 And I enter "" in the Password field
 And I click the Login button
 Then I should see an error message

Examples:
 | username | password |
 | RameshKumar | WrongPass123 |
 | PriyaIyer | Chennai@Login99 |
```

```

Playwright

```

```ts
import { Page, Locator } from '@playwright/test';

export class LoginPage {
 readonly page: Page;
 readonly usernameInput: Locator;
 readonly passwordInput: Locator;
 readonly loginButton: Locator;
 readonly loginForm: Locator;

 constructor(page: Page) {
 this.page = page;
 this.usernameInput = page.locator('#username');
 this.passwordInput = page.locator('#password');
 this.loginButton = page.locator('input[type=submit][value=Login]');
 this.loginForm = page.locator('#login');
 }

 async open() {
 await this.page.goto('/login');
 }

 async login(username: string, password: string) {
 await this.usernameInput.fill(username);
 await this.passwordInput.fill(password);
 await this.loginButton.click();
 }
}
```

```

2. to add a new value in ui dropdown

Ask: There are 3 models available under Select Model dropdown in the Settings tab. I want to add one more model. Analyze the code and provide me the class and function where i need to update the code
