

Home Assignment

1) Get the List of Open weight LLM from different service providers

a) Open ai

- **gpt-oss-20b** — smaller model intended for lower-resource deployment.
- **gpt-oss-120b** — larger, more capable model.
- Both are designed for **local/self-hosted deployment** and use an open-weight licensing approach.

b) Qwen

Qwen has one of the broadest open-weight model families:

- **Qwen3** — current-generation general-purpose models.
- **Qwen3-Coder** — optimized for programming and software-engineering tasks.
- **Qwen2.5** — previous generation, with models ranging from very small models to **72B**.

Qwen also provides specialized models for areas such as mathematics, vision, and embeddings.

c) Deepseek

DeepSeek's major open-weight models include:

- **DeepSeek-R1** — reasoning-focused model.
- **DeepSeek-V3** — general-purpose mixture-of-experts model.
- **DeepSeek-R1-Distill** — smaller distilled reasoning models based on Qwen/Llama architectures.
- **DeepSeek-Coder** — coding-focused models from the earlier DeepSeek generation.

2) Hallucination check for the below prompt

Write a 4-line poem where every line ends with a word that strictly rhymes with the word 'Silver'.

a) qwen ai

The cold wind makes the willow shiver,
And makes the autumn branches quiver,
I carve a tiny wooden sliver,
A secret message to deliver.

b) Chatgpt

There are **no common English words that strictly (perfectly) rhyme with "silver."** The word is famously rhyme-resistant. If repeating the exact word is acceptable:

Silver

Moonlight shimmers soft as silver
Stars descend and glow like silver
Dreams drift quietly, bright silver
Night wraps everything in silver

If you want, I can also make one using a **near-rhyme** such as *river* / *quiver*.

c)Deepseek

There is no perfect rhyme for silver —
No word in English truly fills her
Echo's space, though poets quiver
Seeking sounds that match her shimmer.

d)Gemini

A shadow fell upon the wood, cold and **chilver**,
As silent arrows quivered in their **quiver**.
The frozen leaves began to shake and **shiver**,
Beside the icy waters of the **river**.

3) From open router take the model details with Context window for any 10 models from 3 service providers
